

A photograph of a family of three—a woman, a young girl, and a man—all smiling and laughing joyfully. They are dressed in white shirts. The background shows a modern living room with patterned wallpaper, two framed pictures of pink flowers, and a dark wood cabinet. A green semi-transparent banner is overlaid on the left side of the image.

Wiser Home Control

schneider-electric.co.in

Life Is On

Schneider
Electric

Your home is more than four walls; it is a living, breathing space.

The sanctuary where your journey unfolds and evolves.

A place for every mood and any occasion.

Your home is full of life, love, laughter, family, friends and fun.

We help adapt your home to the rhythm of your life.

We provide ingeniously designed solutions to enhance your life.

We create technology that brings your home to life.

Your household appliances, your lights, your computers, your mobile phones... all used to work independently, even in smart homes.

Wiser Home Control truly integrates your **electrical, multi-media** and **telecommunications** technologies into single user-friendly solution.

It's not just being smart, it's running your home with wisdom.

Take control by simply being Wiser

Wiser Home Control makes technologies in your home easy by providing seamless control of music, home theatre, lighting, air conditioning, sprinkler systems, curtains and shutters, security systems... you name it.

Usable anytime, anywhere even when you are away, via preset shortcuts or direct control, in the same look and feel from a wall switch, a home computer, or even your smartphone or TV – there is no wiser way to enjoy 24/7 connectivity, comfort and convenience, entertainment and peace of mind worldwide!

For some, quality of life and lifestyle is purely a question of adding lavish décor, fixtures and furnishings to the home. For Wiser homeowners who know what the right choices are and always make them, they enjoy ultimate control that will help save the planet, yet perpetuate the exquisite style and impeccable quality of life.

So take control and enjoy every minute of your life by simply being Wiser!

It's simpler than you think!

Just connect your Wiser Home Controller and your home automation system to any device at home, then you can run your home in a wiser way via a usability-optimised user interface that is intuitive and enjoyable to use every day.

The Home Controller is the interchange of the entire Wiser Home Control. It connects with the Home automation system to bring a whole new level of functionality and connectivity throughout the home via a single user-friendly solution.

Consistent and intuitive user interface

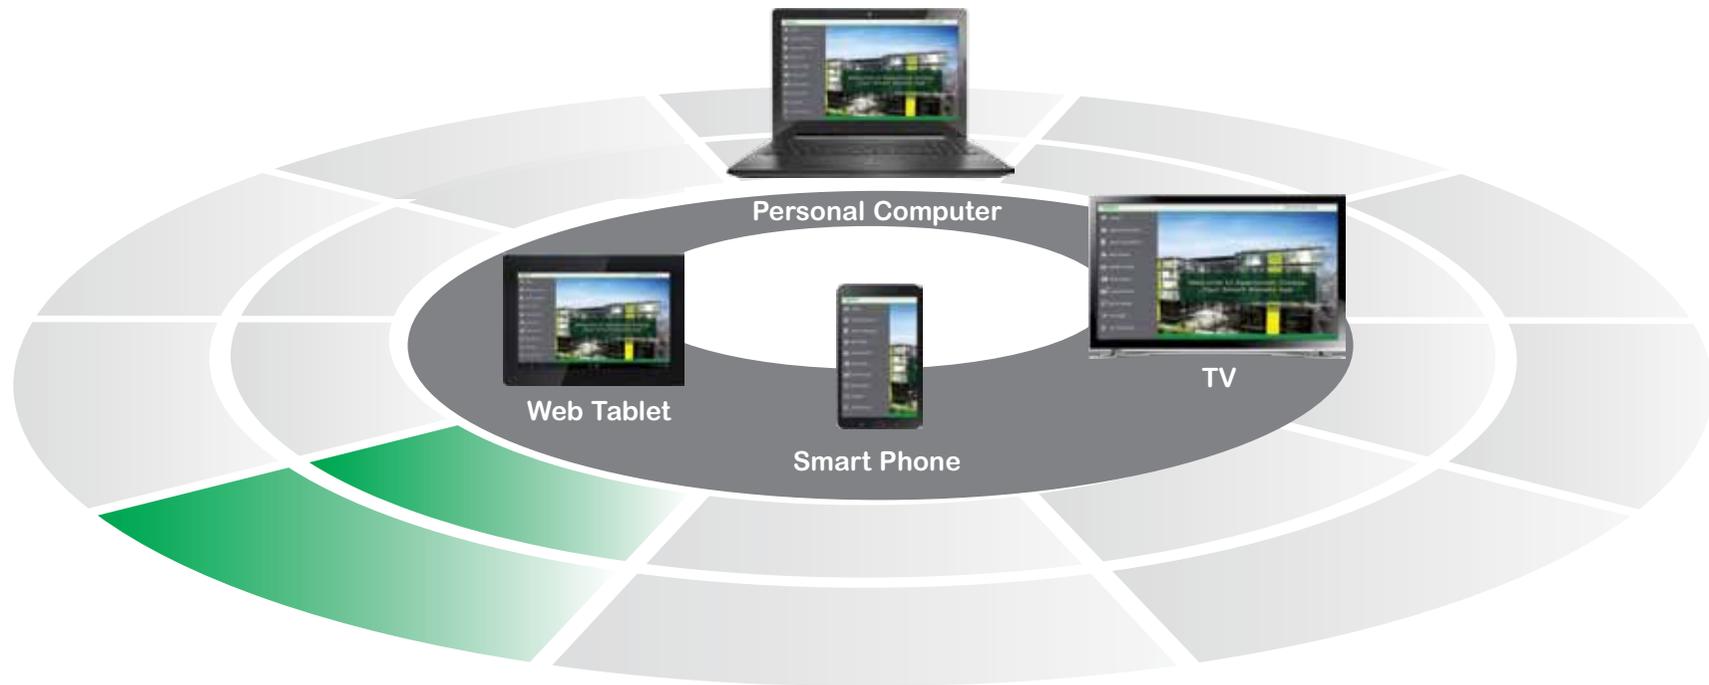

Earlier you had to learn how to operate a whole lot of different and often bewilderingly complicated equipment – one controller for your air-conditioner, another for your security system, yet another for your sprinkler system, and still more remotes for your TV and audio equipment... It was all too difficult!

Now, Wiser sets you free from trouble with our consistent and intuitive user interface. You can control everything you want to operate with a touch – lights are turned on or off via a light bulb icon, sound systems via a speaker icon and sprinkler via sprinkler icon... things can't get any simpler.

You're in charge from the moment your system is set up

The user interface is not just user-friendly, it even helps you make sure your system is set up the way you like. The wireless platform and the jargon-free language enables you to be actively and easily involved from the moment you decide to install the Wiser Home Control – no surprises from the installer, just the satisfaction that everything is exactly as you want.

Better still, when you want to change any presets, you can allow your installer to give you instant service via the secured remote access without even stepping into your home.

Home Controller:

- Ethernet and Wi-Fi based controller for your Home Automation System
- Support for lighting, air conditioning, multi-room audio and other equipment
- Easy-to-understand user interface
- Built-in scene, scheduling and logic programming modules
- Easily reprogrammable from outside your home/building by installers
- Built-in HDMI connection for your TV control

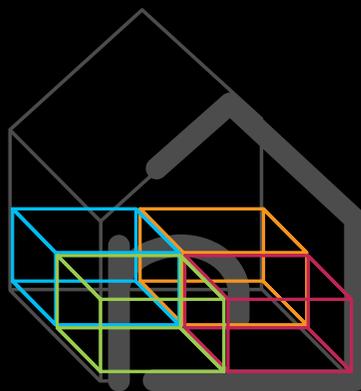

User Interface:

- Common, intuitive interface for all your devices
- Choice of user interface devices
- Control via your mobile phone or other web-enabled devices
- Control via email messages

A better quality of life is as simple as 1, 2, 3, 4

The **comfort and convenience** that comes from complete control

Surround yourself with **peace of mind**

Entertainment that follows you around

The limitless possibilities that open up when you are **fully connected**

Wiser Home Control fully integrates all four benefits in the palm of your hand.

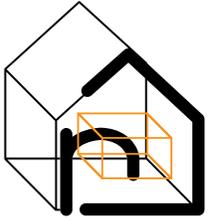

The comfort and convenience that comes from complete control

It's easy to create and manage the ambience of your entire home, and operate nearly anything from anywhere and at anytime. Just reach for your nearest control device... and you're all set.

Wiser Home Control isn't only about giving you complete control. With Wiser, things in your home can happen automatically according to your lifestyle and routine. So gently wake up on weekdays as your music slowly fades up, your curtains open and your alarm system deactivates from night mode. And when you head to work, your lights turn off, your blinds close, your music fades and your air conditioner powers down when you touch the "Goodbye" button.

Entertainment that follows you around

Transform your living room into a home theatre. Let your favourite music travel with you from the living room to the garden and all places in between.

Ready to zone out with a movie? To enjoy optimal picture and sound quality when playing your Blu-ray discs, a perfect lighting ambience is as important as meticulously positioned and tuned AV equipment. Simply activate the “Home Theatre” scene to automatically close the curtains to eliminate external light, adjust various lights, room temperature and fan speed for the best home theatre ambience, scroll down your projection screen and turn on the disc player... Just one touch of your remote control or web tablet does it all.

You can also turn audio and visual devices on and off, and play, pause, stop or rewind the movie on the TV screen.

SCENE CONTROL

A movie in your theatre, a concert in your concert hall, a TV show in your studio... a well-designed home theatre delivers immersive entertainment and lets you experience the show in its purest possible sense.

MULTI-ROOM AUDIO CONTROL

Any space becomes a unique sound gallery when connected with a multi-room audio system. You can track your favourite album or radio program from one room to another.

Gone are the days where you need to drag a portable stereo and bulky speakers around the house to move music from one room to another. Now you can plug your iPhone, iPod, internet radio, CD player or any digital music player into the Wisernet-connected multi-room audio system and you can select and play your favourite music from

any touchscreen panel on the wall or through a web tablet in any room. Wisernet Home Control supports and controls upto 8 zones or rooms, and each music zone can have its own local sources or play from the main source. You can play the same music throughout the home or listen to your favourite tracks in different rooms.

Surround yourself with peace of mind

Safety and security will give you peace of mind in every corner of your life.

Wiser Home Control interconnects your lights, alarms, web cameras, smartphones and internet. The thought that your home and family are protected at all times makes you feel safe. If your burglar alarm does activate, Wiser Home Control will turn on your lights and alarm to deter intruders and automatically send you an email alert. To be doubly sure everything is OK, you can even check your web cameras via your smartphone or computer to see what's happening. If it's a false alarm, simply turn off your lights and reset your alarm remotely. You experience very little disruption to your day, but a whole lot of peace of mind.

Away for a long vacation? Just activate the pre-programmed "Vacation" mode on the touch screen. This arms your security system and schedules a light switching routine that makes it look like your home is occupied. If you forget to turn on the alarm when you leave home, you can arm it in a few seconds from your smartphone. Peace of mind comes so easy when everything in your home is controllable via your smartphone or laptop computer.

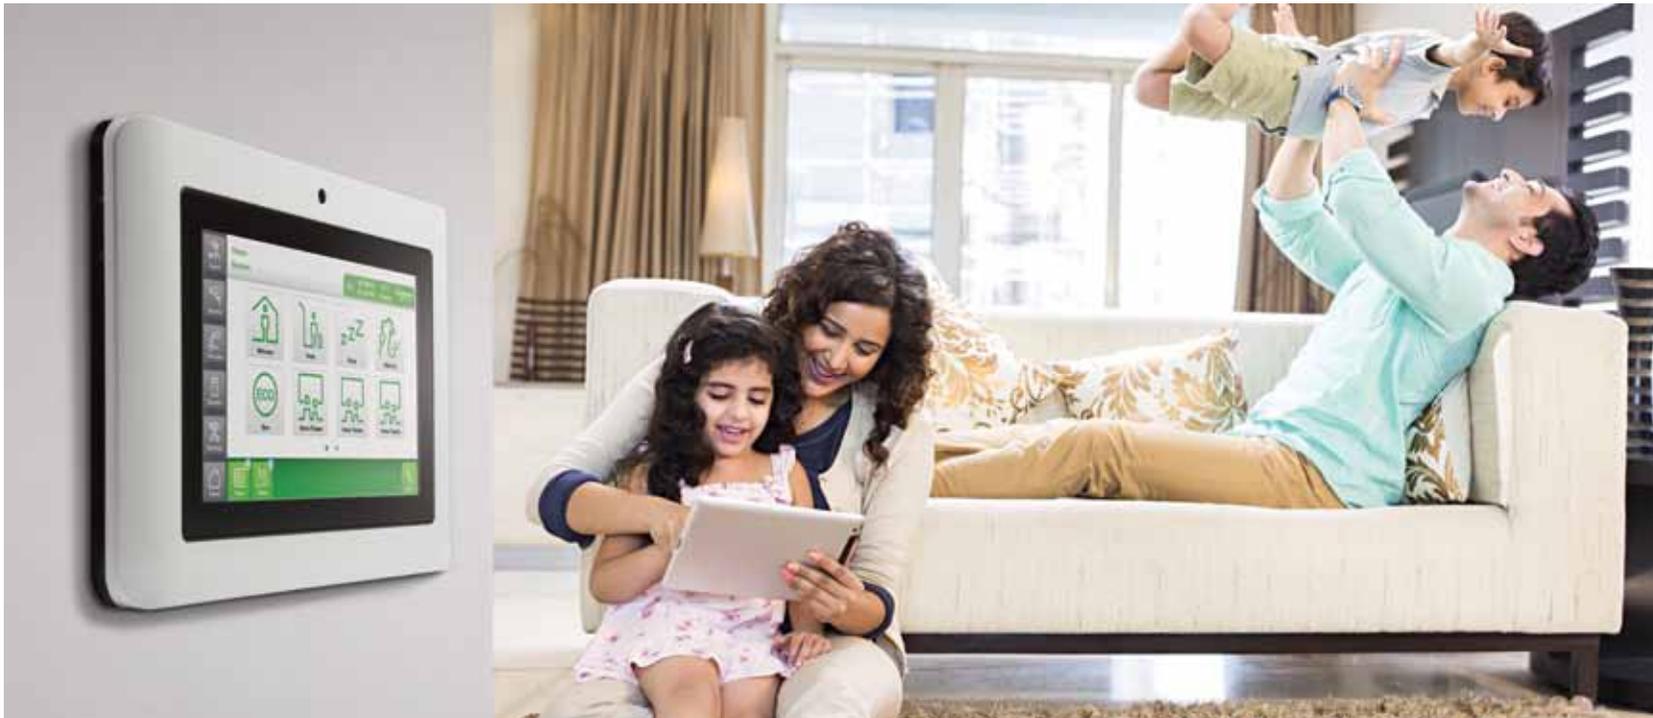

The limitless possibilities that open when you are fully connected

Remotely monitor and control your home from anywhere in the world at any time. **Wiser Home Control** also connects you to the world far beyond the physical boundaries of your home.

With **Wiser Home Control** you can use your smartphone or tablet to monitor that everything is fine at home. Remote controlling all your home is no longer science fiction. You can even enhance your sense of safety by remote video monitoring of your home via your smartphone or office PC.

Home Security & Surveillance

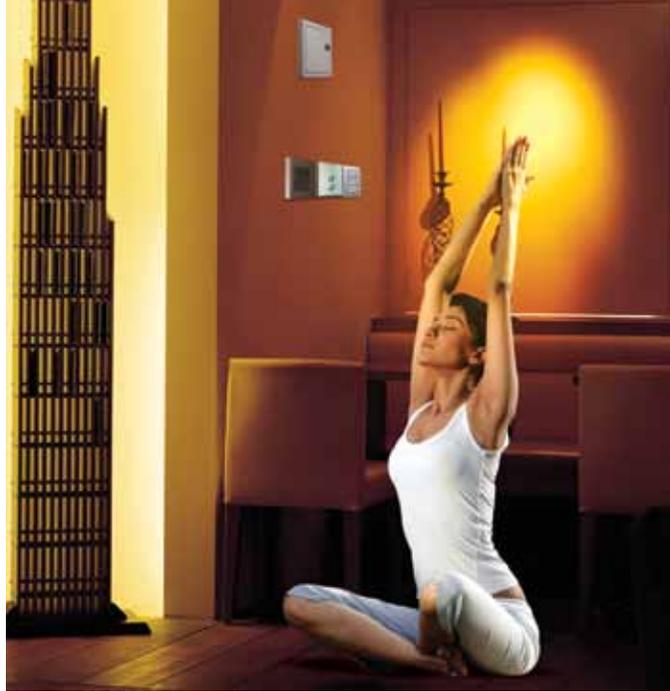

Home security is top priority, and a Security System integrated into a smart home provides far greater benefits to you. Turning on lights as a deterrent, alerting you if there is an intrusion and allowing you to keep an eye on your home from your mobile phone. Smart Home solutions from Schneider Electric can easily arm and disarm your security system via one button. Our cameras are suitable for every lighting condition, environment, and application imaginable. A Home away from Home.

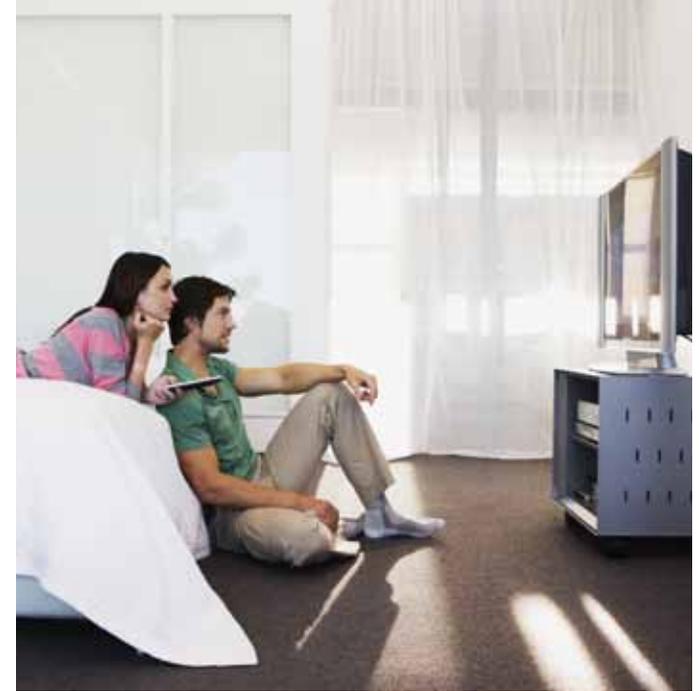

Smart Distribution Board - Make your home electrical system “Come Alive!”

The SMART DB is a paradigm shift in final distribution space, pioneered by Schneider Electric which enables you to remotely communicate with the distribution board in your home. The main objective of the SMART DB is to make your Home Electrical System “Come Alive!”.

Smart Switches

With a rich experience of understanding customers’ lifestyles across 100+ countries and leveraging the latest in Technology, Schneider Electric has been a pioneer in introducing a number of innovative and artful switches worldwide for more than a decade.

FTTH

New-age homes demand new-age technologies like Fibre-to-the-Home (FTTH), a technology that uses optical fibre to deliver communications signal. Schneider Electric’s FTTH solution is a simplified, all-in-one solution that enables wider bandwidth, faster data speed, and better connectivity. It is the perfect solution for today’s high-end digital homes where Video on Demand (VoD) systems and converged smart home features have become the new norm.

Total control throughout your day

Wake up gently to my surroundings

No harsh screaming alarm clocks in my home! My Home Control wakes me up gently by...

- Slowly fading up bed lamps, followed by kitchen and living area lights
- Activating the radio on the multi-room audio system in the bathroom, bedroom or living room
- Opening all the curtains in the house
- Fine tuning the temperature of the air conditioning/heating system

The stress-free way to head off to work

It is time to take the kids to school and to head off to the office. I check the weather and traffic on the touch screen near the main door before leaving home, then press the "Goodbye" scene and let the control system take care of all the rest...

- Opens the garage door as I walk out
- Turns off all the lights and appliances
- Turns off the air conditioning/heating system
- Closes the Out of home mode surveillance camera and security alarm

The house alarm has gone off!

A priority email informs me that the house alarm has been triggered! No need to panic- I simply check from my laptop or via the web browser on my mobile phone by logging into our Home Controller application and access the web cameras. After I check that all is ok I can:

- Reset the alarm system
- Press the "All off" button to turn off the lights that have automatically turned on to deter intruders

Return home with the kids

As I pull into the driveway, press the "Welcome Home" button on my mobile phone and all of the following things start happening:

- The garage door opens
- The curtains open
- Hallway and kitchen lights turn on
- The air conditioning/heating system turns on
- Security system disarms
- Your favorite radio station starts playing through the multi-room audio system

Relax over dinner

After a long day at work, what could be more satisfying than kicking back and enjoying a meal with my family! By simply pressing the web tablet on the kitchen bench top, I can activate the "Dining" mode and:

- Dim the lights over the dining table
- Turn on the multi-room audio system
- Select some cool jazz from the audio player
- Close the blinds

Enjoy some “us time“ watching a movie

It's time for us to relax with a movie! Recline in your sofa and press the “Home Theatre“ mode on my remote control:

- Slowly fading down the lights
- Closing the curtains
- Turning on the flat screen TV
- Powering up your media center and surround sound system

Intermission

Time for a cup of tea and some chocolate cookies! So I grab my remote control and use the menu on my TV to...

- Pause the movie
- Fade up the lamp
- Turn on the kitchen lights
- It's getting cold, so I turn up the temperature too
- Press the “Resume“ button, causing the lights to fade and the movie to start again

And so to bed

I press the “Good night“ scene on the desktop touch screen next to my bed and...

- All the curtains and blinds close
- Lights and lamps slowly fade
- Power supply to standby devices such as the TV and washing machine are turned off in order to save electricity
- Air conditioning system goes into “SetBack“ mode also saving power
- Check the web cameras and make sure the kids are asleep
- “Night“ mode is automatically activated on the security alarm

The weekend starts here!

Great weather, great time - a summer BBQ... does life really get any better than this? I press the “Entertain“ scene on my touch screen and let my home control take care of the rest...

- Music turns on in the family room, kitchen and patio
- The “party“ play list starts booming out of my audio player
- Garden lights and water features set the mood
- Take the web tablet out to dim the lights, select songs and pump up the volume as the party livens up

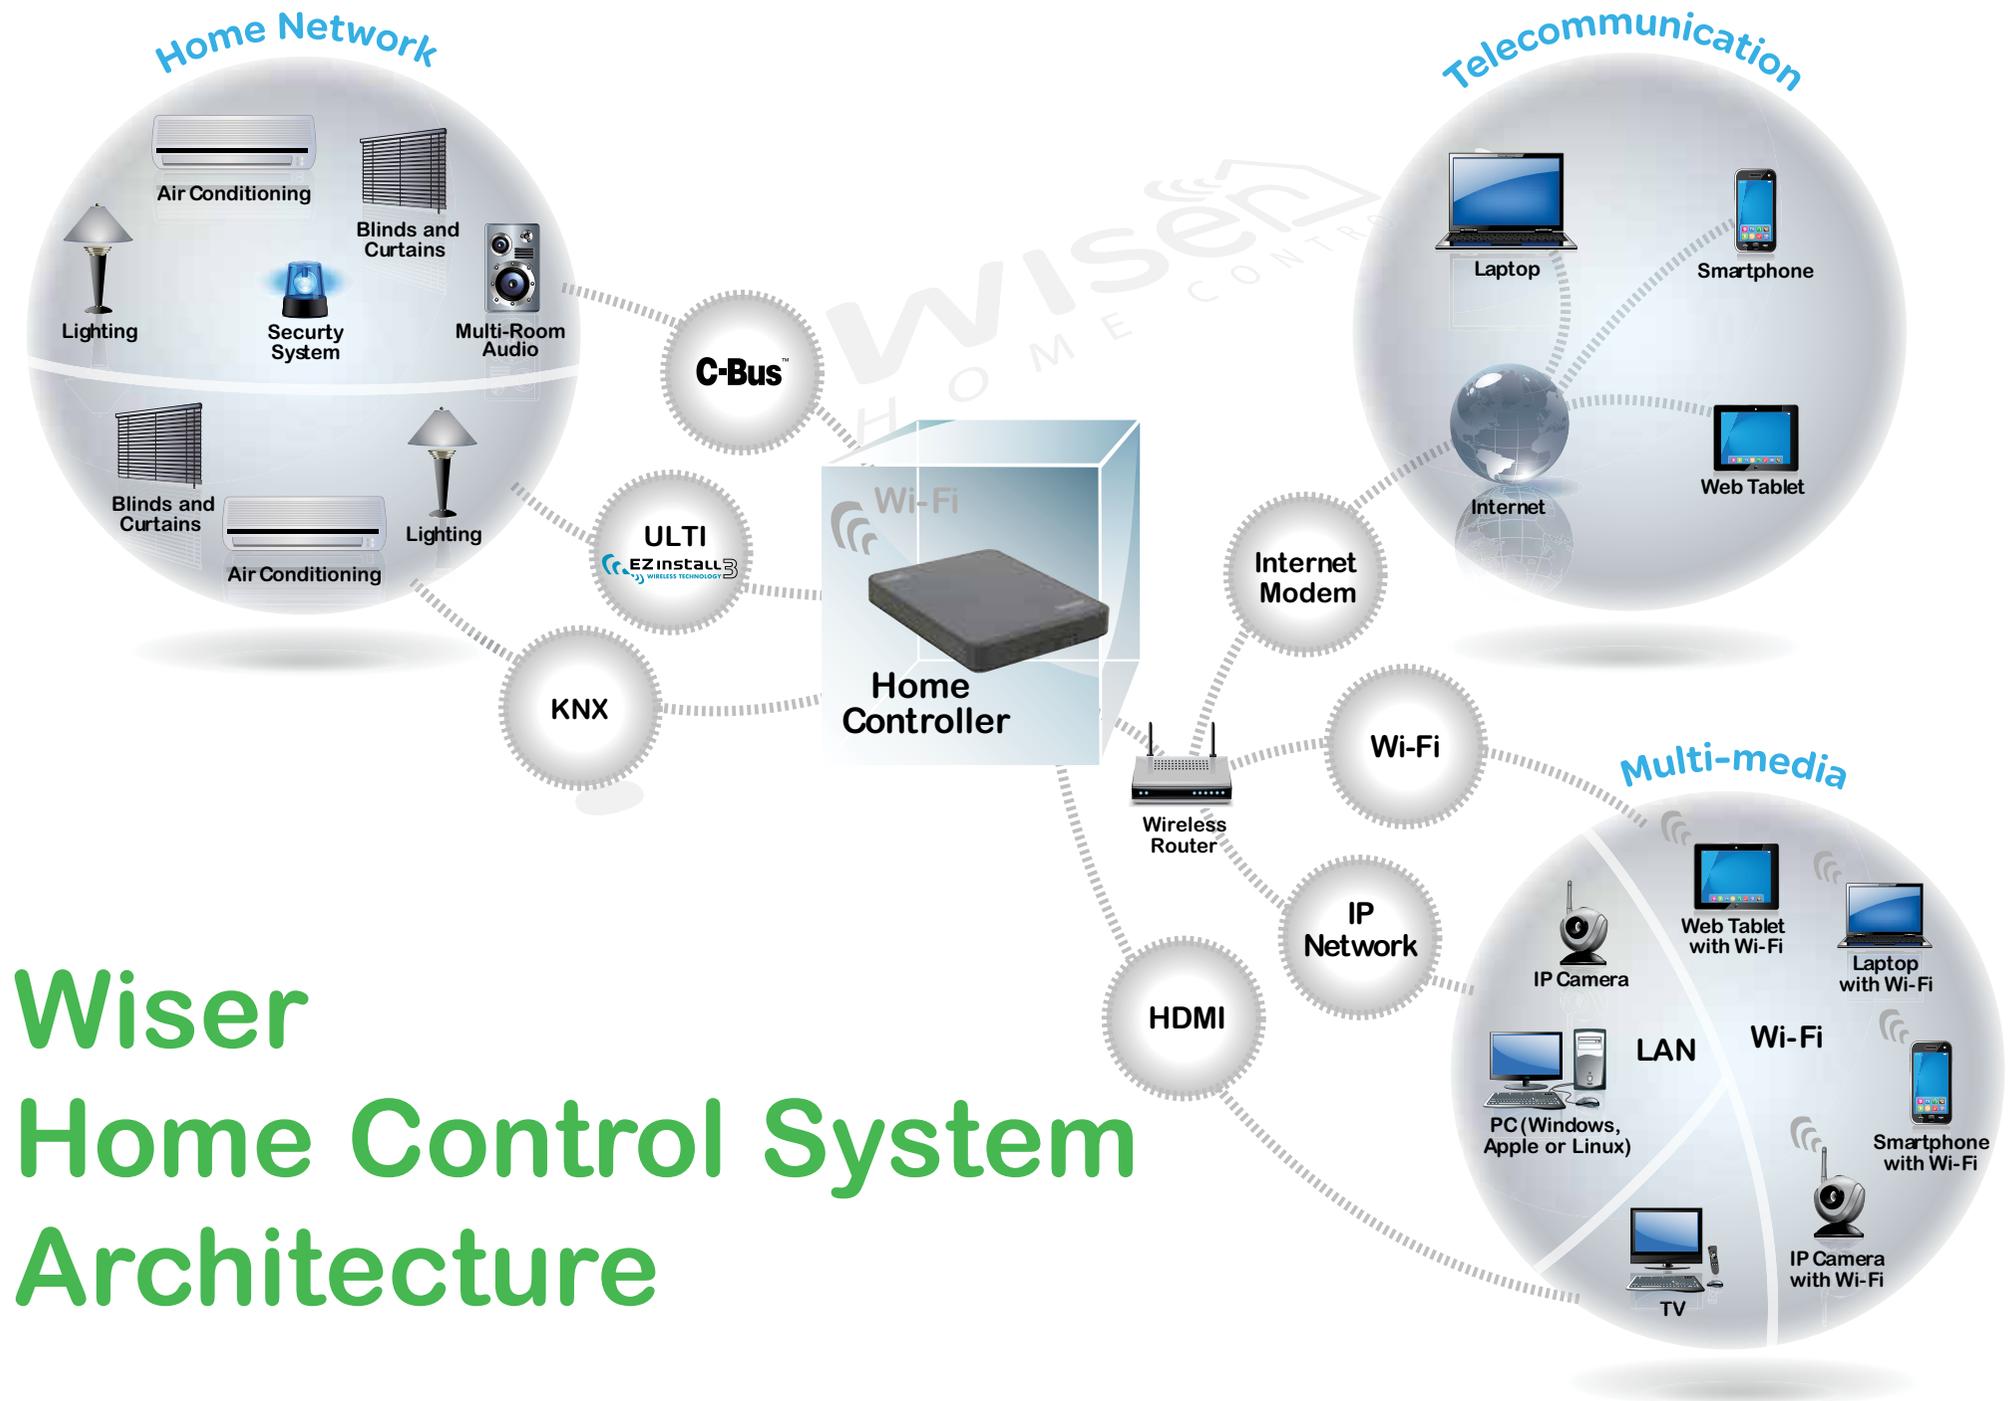

It's holiday time!

Before we all head to the airport for our hard-earned week off, I double check everything is fine at home, and press the “Vacation“ mode on the touch screen, automatically..

- Turning off all of the lights and appliances
- Closing the curtains
- Turning on the alarm system
- Controlling my home from everywhere in the world from a web browser or my mobile phone
